TEN FORWARD CONSULTING ANNOUNCES NEW SECURITY SERVICE THROUGH AGREEMENT WITH ALIENVAULT

Managed Security Service Provider (MSSP) is First of its Kind in Wisconsin

Madison, WI - August 16, 2008 - Ten Forward Consulting, Inc. today announces the launch of its Managed Security Service Provider (MSSP) services powered by AlienVault® Unified Security Management® (USM) technology. Ten Forward Consulting will serve small- to medium-sized businesses (SMBs) in Wisconsin and the US that are looking for customized security services. This is welcome news for IT leaders who are unable to staff security specialists but require compliance for GDPR, HIPAA, PCI, or SOC 2.

Ten Forward Consulting has been providing hosting and support services to clients, in addition to consulting and project-based software development, since its inception in 2012. AlienVault provides a unified security management platform that accelerates threat detection, response and compliance through MSSP partners in North America and throughout the world. By incorporating AlienVault technology, Ten Forward Consulting will deliver a world-class security solution with the hands-on attention, expertise and communication that businesses require.

"AlienVault's USM platform allows us to provide more services to our clients to keep their businesses running, safe, and secure," said Ten Forward Consulting Founder and President, Brian Samson. "Our service will be the first of its kind in Wisconsin; we're looking forward to supporting SMB's who are not equipped for security and compliance alone."

"Our technology combined with Ten Forward Consulting's expertise provides companies with a complete security solution at a competitive price point regardless of their size, limitations in security staff, or IT budgets," said Mike LaPeters, VP of Global Channels. "Ten Forward Consulting can now leverage AlienVault's proven security and threat intelligence platform to help their customers reduce the time needed to detect and respond to today's advanced threats."

AlienVault's Unified Security Management platform enables Ten Forward to monitor both local and cloud environments and provide the following services to their clients:
- Solution Implementation
- Asset Detection
- Ongoing Vulnerability Assessments
- Intrusion Detection
- Behavioral Monitoring
- SIEM & Log Management

About Ten Forward Consulting: Ten Forward Consulting is a provider of custom technology solutions for SMB's, including custom software development and consulting, server hosting, and managed security services. Their proprietary discovery process, diverse team with diverse backgrounds, agile sprint methodology, and commitment to creating environments of inevitable success have propelled Ten Forward Consulting as the go to provider for business solutions when "no one else" is able. https://tenforward.consulting

About AlienVault: AlienVault® has simplified the way organizations detect and respond to today's ever evolving threat landscape. Their unique and award-winning approach, trusted by thousands of customers, combines the essential security controls of our all-in-one platform, AlienVault Unified Security Management®, with the power of AlienVault's Open Threat Exchange®, the world's largest crowd-sourced threat intelligence community, making effective and affordable threat detection attainable for resource constrained IT teams. http://www.alienvault.com
